

Electronic Mail Rules/Filters

Electronic mail rules or filters can help you manage your e-mail coming from the Bankruptcy Court's CM/ECF server. Most email programs provide a way of forwarding or filtering emails to specific email folders based off simple rules. For example, you could set up a rule/filter to send all emails from "unix_wieb@wieb.uscourts.gov" to an email folder called "NEFs-WIEB." There are many email programs available and each has a different way of setting up rules/filters, so to learn more about this topic you can review the program's help menu or documentation on how to set up filters or rules.
